Media kit for sponsors

A search-led tutorial channel: 347 videos, three quarters of the traffic arriving from YouTube search rather than the feed. Placements keep working for years because the videos keep ranking.

Where this audience is

91% of viewers are in South and Southeast Asia — India, the Philippines and Pakistan. If that is your growth market, this channel is priced well below what a US-weighted channel of the same size would cost you.

Evergreen tutorials, ranked by organic views per month. A placement on any of these keeps delivering for as long as the video ranks — which so far is years.

VIDEO	VIEWS / MONTH
Restaurant Menu in Canva	4,700
Digital Art with the Draw Tool	3,800
Product Labels in Canva	2,900
Book Covers for KDP	2,800

Why search traffic is worth more to you than feed traffic

A feed view is a person who was scrolling. A search view is a person who typed the problem your product solves. 76% of views here are the second kind.

Working together

Three formats. All rates in USD, invoiced on delivery.

Sponsored link insertion

$150 / 6 months (one video)
$350 / 12 months (two videos)

Description link above the fold + pinned comment on an existing evergreen tutorial.

Integrated segment

$300

60–90 seconds inside an upcoming tutorial, scripted around a real use case.

Dedicated video

$700

A full tutorial built around a search query your product answers — not a branded review.

How I work

Every placement is disclosed. I only take products I would use in a tutorial anyway.

For a dedicated video I will push to build it around a search query your product answers rather than around the brand — "how to remove a background for free" rather than "[product] review". Same cost to you, and it keeps earning traffic for years instead of dying in a week.

Happy to add an affiliate arrangement alongside the flat fee.
