Etsy Listing Video Card

geniusjunkie.net

Etsy's rules, Canva's limit, and the size to build at. Verified 21 October 2026.

ETSY'S RULES - FROM ETSY'S OWN HELP PAGE

Length	**3 - 15 seconds**	anything longer is not a listing video
Sound	**NONE**	"will not contain any audio once uploaded"
Shape	**2:1 or 1:2**	a 9:16 phone video is neither
Resolution	**1080 px ideal**	500 px minimum
File size	**100 MB max**	MP4, MOV and others
How many	**2 per listing**	almost everyone uses one, or none

The usual scrolling mockup - 9:16, 30 seconds, set to music - breaks all three red rows.

CANVA'S SIDE - TWO THINGS NOBODY TELLS YOU

1. Canva's mockups are STILLS. Elements > Mockups > Smartphones makes a great listing PHOTO - and it downloads as PDF, SVG, JPG or PNG. There is no video option. The scrolling version is built separately.

2. "Each animation can only be 10 seconds long at the maximum." (Canva Help) - so your scroll is 10 seconds or less, which fits inside Etsy's 15 nicely.

THE BUILD - EXACT NUMBERS

```
video page   1080 x 2160    = exactly 1:2
screenshot   1080 wide, up to 3125 tall (Canva's limit)
```

Page 1 the top of the screenshot, still - 2 s
Page 2 Animate > Create an Animation, drag UP, hold Shift - 10 s
Page 3 the bottom of the screenshot, still - 2 s

= 14 seconds. Transitions off, so it reads as one shot. Download as MP4 video.

Pages flying past too fast to read? The screenshot is too tall for 10 s - take a page OUT, don't speed it up.

DESIGN FOR SILENCE - ETSY REMOVES THE SOUND

Watch it with the sound OFF. What does a shopper actually learn?
Facts go on screen as text: how many pages, what size, editable in Canva.
Put the first line on the FIRST FRAME - that second is all most shoppers see.
Nothing that needs a voice: no "watch this", no "here's the best bit".

SEVEN CHECKS BEFORE IT GOES ON ETSY

* The page is 1080 x 2160 - one to two
* The video is under 15 seconds
* The scroll is 10 seconds or less
* Every page is readable as it passes
* **The facts are on screen, and it makes sense with the sound OFF**
* The first frame says what the product is
* You made the SECOND video too - e.g. the template opening and being edited in Canva

The fifth is the one nobody checks - because they never watch their own video silent.
