KDP Coloring Book Spec Card

geniusjunkie.net

Every number Amazon actually requires. Verified 24 September 2026.

THE ONE THAT BREAKS BOOKS

Minimum line weight: 0.75 pt · 0.01 in · 0.3 mm

A coloring book is nothing but lines, so this applies to every stroke in it. Canva's element line art is often 0.5 pt — under the floor. It looks perfect on screen and prints as a broken dotted line, or not at all. Work at 1 pt to give yourself the margin.

Scaling an image down scales its stroke down with it.

A 1 pt line at half size is a 0.5 pt line. Resize FIRST, then read the stroke, then fix it.

BLEED — NOT SYMMETRICAL

0.125 in on the TOP, BOTTOM and OUTER edge. Nothing on the inner edge — that is the spine.

```
page height  =  trim height + 0.125 + 0.125   =  + 0.25 in
page width   =  trim width  + 0.125           =  + 0.125 in
```

8.5 x 11 in -> 8.625 x 11.25 in

Canva's bleed sits on all four sides. Do not use it — type the bled size in as your custom size.

INSIDE MARGIN — BY PAGE COUNT

24 – 150 pages	151 – 300	301 – 500	501 – 700	701 – 828
0.375 in	**0.5 in**	**0.625 in**	**0.75 in**	**0.875 in**

Outside margin: 0.25 in minimum without bleed, 0.375 in with it.
Change the page count and the inside margin may change — go back and check it.

EXPORTING FROM CANVA

PDF Standard	**96 DPI — do not use**
PDF Print	**300 DPI — use this**
Crop marks and bleed	**LEAVE UNTICKED**
Flatten PDF	**TICK IT**

You already built the bleed into the page size. Flatten also embeds fonts, which Amazon requires.

ALSO TRUE

- Minimum 24 pages. Amazon rounds the page count UP to an even number.
- Images at least 300 DPI. Fonts embedded. Transparency flattened.
- Custom trim: width 4–8.5 in, height 6–11.69 in.
- Interior and cover are two separate uploads — lock the page count before making the cover.
- Blank backs are a convention buyers expect (markers soak through), NOT an Amazon rule.
