Canva POD Licence & Size Card

geniusjunkie.net

What you may sell, at what size. Verified 5 October 2026 against Canva's own pages.

THE ONE THAT CLOSES SHOPS

PRO content may NOT go on a t-shirt you sell.

"Use or display the Content on a standalone basis on websites or other venues designed to induce or involving the sale, license or other distribution of 'on demand' products, including postcards, mugs, t-shirts, posters and other items."

Canva Content Licence Agreement — what you may not do with Pro Content

FREE content explicitly MAY.

"prints, posters (i.e. hardcopies) and other reproductions for personal or promotional purposes, resale, license or other distribution."

Same agreement — permitted uses of Free Content

The only visible difference is a small crown on the thumbnail.

And once the element is on your canvas you cannot see it at all. There is no "is this safe to sell" button.

SO THE CHECK HAPPENS AT THE POINT OF PLACING

- Elements -> the filter icon -> Price: Free. EVERY search, not once per session — it does not always persist.
- Unsure about an element already in a design? Delete it and place it again from a filtered search.
- On a FREE plan the download dialog lists Pro content before it will export. On PRO it says nothing,
- because for every OTHER purpose you are entitled to use it. Your subscription is not the issue.

Rebuilding is cheaper than a takedown.

THE PRINT FILE

Print area (max)	Resolution	Pixels across	Format
12 x 16 in	**150-300 DPI**	**3,600-4,800**	**PNG, transparent**

`4500 x 5400 px` — a comfortable middle that fits a 12 x 16 area at 300 DPI.

Printful's figures, named as an example. Providers differ — check your own provider's spec page.

THE EXPORT, AND THE IRONY IN IT

Downloading with a transparent background is "only available to Canva Pro, Canva Teams, Canva Business, Canva Education, and Canva for Nonprofits plans." (Canva Help Centre.) So you need Pro for the export and you must not use Pro in the design. Both are true at once.

Share -> Download -> PNG -> Transparent background ON. Tick 2x size if offered — more pixels is the cheap win.

SIX CHECKS BEFORE YOU UPLOAD

- ✓ **Every element came from a search filtered to Free, or you made it.**
- ✓ PNG with transparency actually on — checked against a dark background.
- ✓ Dimensions in the thousands, matching your provider's print area.
- ✓ Your thinnest line survives at 100% zoom. Fabric cannot hold a hairline.
- ✓ Print file and listing images in different folders.
- ✓ A note of where every element came from. Two lines per design.

The first one is the one that matters legally, and the one that cannot be fixed after the fact.
