# Wedding Stationery Size Card

geniusjunkie.net

Every card and envelope, in inches and millimetres. Verified 28 September 2026.

## THE ONE THAT COSTS MONEY

## "A7" is two completely different sizes

| | | |
|---|---|---|
| **A7 envelope · United States** | **5.25 x 7.25 in** | *holds a 5 x 7 card* |
| **A7 paper · ISO 216** | **74 x 105 mm** | *holds nothing in this suite* |

Order the envelope by its MEASUREMENT, never by its name. The envelope must be bigger than the card in both directions, by about an eighth to a quarter of an inch. If the two numbers look the same, stop.

## THE SUITE

| PIECE | INCHES | MILLIMETRES | ENVELOPE / NOTE |
|---|---|---|---|
| **Invitation** | 5 x 7 in | 127 x 178 mm | A7 envelope (US) |
| **Details card** | 5 x 7 in | 127 x 178 mm | stacks with the invitation |
| **Reply card** | 3.5 x 5 in | 89 x 127 mm | A1 envelope, or 4 x 6 postcard |
| **Order of service** | 5.83 x 8.27 in | 148 x 210 mm (A5) | folded from A4 |
| **Table number** | 5.83 x 8.27 in | 148 x 210 mm (A5) | standing in a frame |
| **Seating plan** | — | A2 or A1 | by guest count |

## WHY ISO A7 IS SO SMALL — IT IS ARITHMETIC

A4 210x297 -> A5 148x210 -> A6 105x148 -> A7 74x105

Each size is the one above halved across the long side. A7 is not a choice.

## PRINTING AND POSTING

- Bleed 0.125 in every side (5 x 7 becomes 5.25 x 7.25). Keep all type 0.25 in inside the trim.
- Print at ACTUAL SIZE / 100%. Every print dialog defaults to Fit, which shrinks the card.
- Print ONE and put it in the envelope before ordering any quantity.
- Square envelopes, wax seals, ribbon and anything rigid are non-machinable and cost more to post.
- No postage price is printed here on purpose — weigh one sealed invitation at the counter.
- Write the month as a word. 10/09/2027 is two different days depending on who reads it.

ISO 216 computed from A4 = 210 x 297 mm. US envelope sizing per standard announcement-envelope charts.
